REFERENCE LETTER:

Boretta Construction Ltd.
1383 Dugald Road
Winnipeg, Manitoba
R2J 0H3

TO WHOMEVER IT MAY CONCERN:

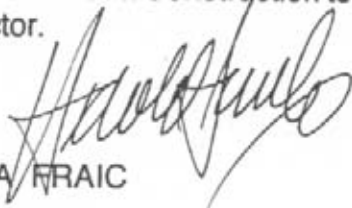

I am pleased to provide the following reference, having worked with Boretta Construction on several projects involving considerable size and complexity.

As I got to know Mr. Greg Fast, president, I came to greatly appreciate his real interest in quality buildings and his complete commitment to establishing a high standard of building in the building industry. In this effort, Mr. Fast has expanded his company to include quality control personnel. The staff employed is experienced and all work well with Sub-Contractors, Owners and Architects. I also came to appreciate the close relationship Mr. Fast kept with the Owner for whom Boretta implemented the building, assuring the Owner along the way that the best would be done until the building was complete.

From our experience, Mr. Bill Danners, vice-president and chief estimator, is one of the best estimators in the Province. His costs are determined in close discussion with both the Architect and his Engineers and with the construction trades involved. Mr. Danners usually knows within 5% where the cost of the project will be once the construction drawings have been completed. This is the kind of assurance both the Owner and the Architect require as far as cost control is concerned, to make a project successful from beginning to end.

Boretta employs experienced superintendents. The objective is to work closely with the Architect and Engineers to ensure compliance with the drawings as well as high quality of work which will satisfy both the Owner and the Architect. Supervision and management from the field and the office is very good. It is always appreciated when communication is flowing well between all parties so that the end product is as expected as well as pleasing.

I highly recommend Boretta Construction to any Client who is looking for the services of a reputable Contractor.

Harold Funk, MAA, FRAIC
