Re: Letter of Reference for Boretta Construction 2002 Ltd.

To Whom it May Concern.

I have had the pleasure of working with Boretta Construction on an 18,000 square feet \$6M facility expansion project for the Manitoba Food Development Centre. The facility centers around the building of food processing suites and a commercial filling line that required a higher standard of finish and complex mechanical and electrical systems to meet Canada Food Inspection Agency guidelines to achieve certification. Throughout the project Boretta ensured that subcontractors adhered to the construction schedule and maintained a high quality of workmanship. They have worked well with our engineering consultants resolving obstacles and challenges in a timely manner.

As with most projects there were changes to the original scope of work. Boretta dealt with these quickly and efficiently to ensure that the construction schedule would be met. Communication has been a key factor in the success of this project not only with Boretta Head Office personnel but also with site supervisors. Boretta staff was available allowing issues to be resolved quickly and efficiently.

I am confident that Boretta will be able to bring the project to a successful completion in February, 2005. Teamwork has allowed the project to be a success.

I look forward to our next project together.

Respectfully Submitted,
