To Whom it may concern:

The purpose of this letter is to provide a reference for Boretta Construction.

The writer has recent experience working with Boretta Construction on two significant projects: i) a \$5.8M addition and renovation to a "food grade" research and development facility, and ii) a \$600k addition and renovation to an existing church.

Throughout these two projects, the majority of my dealings were with Mr. Sig Banmann, Senior Project Director. I found Sig to be very knowledgeable, organized and cooperative. All of his people displayed a genuine concern for the quality of their work. Also, site issues were routinely resolved in a pro-active and amicable fashion.

I would gladly recommend Boretta Construction for any other projects of similar scope and complexity.

Yours Truly,

Tower Engineering Group Inc.
